

Windows 11 Pro Activation Guide

Downloadlink: <https://www.microsoft.com/en-us/software-download/windows11>

ACTIVATION INSTRUCTIONS:

1. Go to the Start Menu and select Settings. Then navigate to the Activation category and choose the Change Product Key option.
 2. Click on Change Product Key and enter your purchased 25-digit product key. Confirm the entry, and Windows will be activated.
-

Switching from HOME to PRO

If Windows 11 Home is pre-installed, the purchased product key for Windows 11 Pro cannot be activated directly, and an error message will appear. Please follow these exact steps to successfully activate Windows 11 Pro!!

Step 1

Ensure your device is not connected to the internet. Disconnect all internet connections first.

Step 2

Open the Start Menu and go to Settings. Then, open the Activation category and click on "Change Product Key."

Step 3

Enter the following **generic upgrade key** and click Next to confirm your entry.

Upgrade Key: VK7JG-NPHTM-C97JM-9MPGT-3V66T

This key is a placeholder and will not activate Windows. It is provided by Microsoft for the upgrade process only.

Step 4

After the upgrade, restart your PC and reconnect it to the internet.

You now have Windows 11 Pro installed.

Step 5

Windows 11 Pro is now installed on your device **but not yet activated**. Click on "Change Product Key" again and **enter the purchased product key** from us.

Windows 11 Pro Activation Guide

Error Codes:

- **0xC004F213:** Your hardware may not meet the minimum requirements for Windows 11 Pro.
- **0xC004C060:** The Microsoft activation server is currently overloaded or unavailable. Try activating later or use phone activation.
- **0x8007007B:** The product key was entered incorrectly.
